DONATE EDUCATION TO CHILDREN

Our non-profit NGO Labdoo.org seeks IT donations for children, schools and refugees projects around the world.

We collect unneeded laptops, ebook readers and tablets from individuals or companies. You can help to avoid electronic waste and, at the same time, donate your old device to bring education to children. Your old data will be safely deleted by our experts.

Or become a Labdoo volunteer and contribute by collecting and/or sanitizing IT donations.

DELIVER A LAPTOP TO A CHILD

You can also support us as a traveler, carrying donated IT to children in your luggage or car. By adding the devices to an existing trip it remains carbon-neutral.

WHAT WE OFFER IN ADDITION TO IT DONATIONS

We load our IT donations with free educational content, offline wikis in their language and more than 300 educational and office programs, from pre-school to university level.

WE ARE ALWAYS LOOKING FOR PROJECTS TO SUPPORT

Do you know a school or youth project in need of free IT devices? We would be happy to check and contribute.

HOW LABDOO WORKS
