To whom it concerns

date of flight

confirmation, free laptop / PC donation

Dear Sirs,

This letter is to confirm that the traveler, presenting this letter, is bringing used, but sanitized and fully functionally laptops or PCs as a free donation for a Human Aid Project or school (not commercial) into your country. These laptops / PCs will be used to teach students computer skills, school courses and provide access to education at school projects in your country.

Labdoo, as the giver of this donation, is a NPO that focuses on bringing laptops / PCs to schools around the globe. No longer used laptops are collected in European et.al. countries from private person as free of charge donations and include open source education software to help educate children. A global network of volunteers is supporting Labdoo.

Labdoo laptops are sanitized by a global network of volunteers and include open source education software to help educate children. To avoid environmental costs, all laptops / PCs are used (not new), donated from their former owners and are transported from one location to another using a network of volunteer travellers.

Yours truly,

Ralf Hamm
1.Vorsitzender / CEO Labdoo.org e.V.
